Summary

Computer Science student at Nirma University (CGPA 8.34/10) and Diploma topper (9.71/10) with **3 software development internships** and **2 live AI SaaS products** shipped solo. Builds production software end to end — multimodal LLM pipelines, multi-agent orchestration, RAG, and federated learning — owning the data model, backend, AI layer, interface, and deployment.

Education

Nirma University

Bachelor of Technology (B.Tech), Computer Science and Engineering

Ahmedabad, Gujarat, India

July 2024 – July 2027 (Expected)

- **CGPA: 8.34/10.0** Relevant Coursework: Data Structures & Algorithms, System Design, Database Management Systems, Machine Learning, Operating Systems, Computer Networks

Government Polytechnic Ahmedabad

*Diploma, Information Technology — **Batch Topper***

Ahmedabad, Gujarat, India

January 2021 – July 2024

- **CGPA: 9.71/10.0** Relevant Coursework: Back-End Development, Android Development, PHP, Machine Learning, Database Systems

Experience

Full Stack Developer Intern

May 2026 – July 2026

Alvi Software Pvt. Ltd.

Ahmedabad, India

- Developed front-end interfaces and back-end services in a production codebase across a **2-month** full-stack internship, spanning database management, REST API integration, and debugging
- Integrated REST APIs between the front end and backend services and resolved defects surfaced in testing and code review, delivering assigned features on schedule with the development team

Software Development Intern (Android)

July 2023 – August 2023

BrainyBeam Technologies Pvt. Ltd.

Ahmedabad, India

- Built **3** production Android screens — registration, login, and profile management — during a **6-week** internship under senior engineers, implementing client-side input validation and native date-picker integration
- Shipped maintainable, lifecycle-aware MVC modules through **Git** version control and peer code-review workflows

Software Development Intern

August 2022 – September 2022

InfoLabz

Ahmedabad, India

- Built web and backend modules against real client requirements over a **2-month** internship, contributing tested, deployment-ready business logic
- Executed all **4** phases of the software development lifecycle — requirements, implementation, testing, and deployment — within defined project timelines

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, SQL, Solidity, PHP, Shell, HTML, CSS

AI / Machine Learning: LLM Integration (Gemini, Groq), RAG, Multi-Agent Systems (LangGraph), Fine-tuning (QLoRA), Prompt Engineering, LLM Evaluation & Guardrails, PyTorch, Scikit-learn, NLP, Federated Learning, Differential Privacy

Backend & Databases: FastAPI, Node.js, Express.js, REST APIs, System Design, Multi-Tenant Architecture, Row-Level Security, PostgreSQL, MySQL, Supabase, MongoDB, Redis

Frontend & Mobile: React.js, Next.js, React Native, Expo, Tailwind CSS, Responsive Design

Tools & Cloud: Git, GitHub, Docker, Linux, CI/CD, AWS, Google Cloud, Vercel, Twilio, Razorpay, Automated Testing, Agile

Projects

BillAI — AI GST Invoicing on WhatsApp | *Next.js, Gemini AI, Supabase, Twilio* | 🌐 **Live**

May 2026

- Built and deployed a **live production SaaS solo in 2 weeks**, letting Indian small businesses create GST-compliant invoices in **under 10 seconds** from WhatsApp
- Engineered a **multimodal Gemini pipeline** extracting structured invoice data from text, voice notes, and images across **3 languages**, with a GST engine covering all **36 state codes**
- Architected a secure **multi-tenant** backend (PostgreSQL Row-Level Security) integrating **5 external services**, plus automated GSTR-1 reports via cron; **Lighthouse 95+**

LexAI — AI Legal Drafting & e-Signing | *Next.js, Gemini AI, Supabase, Razorpay* | **Live** June 2026

- Shipped a **second live SaaS** drafting **Indian-law-compliant** legal documents from plain-English or WhatsApp prompts across **30 templates**
- Engineered a **Gemini** pipeline extracting parties, terms, and amounts into formatted PDFs, plus **AI contract risk analysis** flagging unfavorable and missing clauses
- Implemented a swap-ready **Aadhaar e-Sign** adapter with multi-party signing and full audit trail, a versioned document vault, and Razorpay subscriptions

FedChurnGuard — Privacy-Preserving Federated Learning | *PyTorch, Flower, Solidity* | **Live** July 2026

- Built **cross-organization federated learning** (Flower) on separately-owned datasets, letting rival firms train one churn model while raw customer data never leaves any silo
- Implemented record-level **differential privacy** (DP-SGD via Opacus) with verified ϵ -accounting, hardened against a LiRA membership-inference attack
- Engineered a permissioned **blockchain audit layer** (Solidity, Ethereum Sepolia) rejecting **100% of model-poisoning attacks**; closed the loop TreeSHAP $\rightarrow$ counterfactual recourse $\rightarrow$ on-chain offer, with a paper in IEEE Access format

GenAI Systems — Agents, Text-to-SQL & Evaluation | *Python, LangGraph, Groq, Streamlit* 2026

- Built a **multi-agent research assistant** (LangGraph: planner $\rightarrow$ parallel web researchers $\rightarrow$ cited-report writer); across **20 queries** reached **100% task completion** and **10.5 vs 3.8** citations per report against a single-agent baseline  **Live**
- Engineered a **self-correcting text-to-SQL agent** with a 3-attempt error-feedback loop: **78% execution accuracy** on **50** Spider-dev questions with test-suite-style result matching  **Live**
- Developed an **LLM evaluation and guardrails harness** (LLM-as-judge, CI regression gate) with a prompt-injection detector across **11 signal families**: **89.8% accuracy**, 8.3% false-positive rate  **Live**

Trustly — Cross-Platform Reputation Network | *React Native, Expo, Supabase, PostGIS* | **Code** June 2026

- Built a social reputation platform (profiles, reviews, radius discovery, media feed) running on **iOS and Android from a single** type-safe React Native codebase
- Engineered a Supabase/PostgreSQL backend across **15 migrations** with Row-Level Security and triggers over a **5-profile-type** multi-tenant model
- Implemented **PostGIS** radius search ranked by a credibility-weighted **Bayesian rating** with review-bombing defenses; shipped signed releases via **EAS CI/CD**

MEHFIL — Cinematic Retro Music Web App | *Next.js, GSAP, Web Audio API* | **Live** July 2026

- Built a **scroll-as-camera** homepage driving a pinned, GPU-only scene through **4 media eras** (shellac $\rightarrow$ vinyl $\rightarrow$ cassette $\rightarrow$ CD); **Lighthouse 99/100/100/100** in production
- Engineered seeded **SVG** generative art per track across a **210-track** catalog and synthesized all sound with the **Web Audio API** (zero audio files); **WCAG AA** across **4 scripts**

Also built: **BASIS** — market-spread monitoring desk (rolling z-scores, half-life, ADF tests) · **VoiceServe** — AI voice ordering with association-rule upselling · **HireAi** — ML resume ranking · **Portfolio** — custom 2D canvas engine, 3 adaptive performance tiers.

Certifications & Hackathons

Certifications: AWS Academy Graduate — Cloud Foundations · Machine Learning Specialization (DeepLearning.AI & Stanford Online) · **19 Google Cloud Skill Badges** (Vertex AI, Gemini apps, Pub/Sub, Looker, Dataplex) · Claude 101 and AI Fluency (Anthropic)

Hackathons: **HACKaMINeD 2026** (Nirma $\times$ Binghamton) — built *VoiceServe* for the Petpooja track · **Codeversity National Hackathon 2026**, AI domain (IIT Gandhinagar) — built *HireAi* · **SSIP New India Vibrant Hackathon** (Gov. of Gujarat)
